

Reading Guide

You can reach out to any of the students at the following email addresses:

Zoe J.D.M. Spyrou: z.spyrou@student.fontys.nl, spyrouzoe@gmail.com

Tim C.P. Moorsel: tim.vanmoorsel@student.fontys.nl

Nico Mohammadi: nico.mohammadi@student.fontys.nl

Title	Summary	Author
Researching ways to mask activity on Snapchat through preexisting tools	Analyzing the use of Snapenhance to characterize its features for potential investigative support, before considering custom solutions. Understand which platform works best (app, VM, browser).	Zoe J.D.M. Spyrou
Deep Dive into Snapenhance Web (Analysis and Testing)	Analyze how Snapenhance currently works as-is in a web browser and find weak spots in Snapchat's front-end.	Zoe J.D.M. Spyrou
The journey of a Snapchat message - Traffic Capture	Analyze the "journey" a message sent on Snapchat goes through before reaching the receivers' device, for messages sent on the mobile version of the app.	Zoe J.D.M. Spyrou
Replacing the Android Phone's Camera with a Virtual Camera	Send images that appear "just-taken" in Snapchat.	Zoe J.D.M. Spyrou
Translating the solution to a user-friendly end product	The steps taken to create the graphical interface with which the police will be interacting with the VCAM module and sending AI generated images to replace the phone's built in camera; and subsequently the stream that Snapchat uses.	Zoe J.D.M. Spyrou

Desktop GUI and Cross-Platform Streaming	This document continues on the previous document, Replacing the Android Phone's Camera With a Virtual Camera.	Zoe J.D.M. Spyrou
Designing the System	This document describes the design process of the system infrastructure and explains how stakeholder requirements were translated into a concrete technical solution.	Zoe J.D.M. Spyrou
User Guide	Non technical user guide for the police to operate the GUI and phone.	Zoe J.D.M. Spyrou
Technical Guide	Technical guide for the stakeholder to root a OnePlus CE5 phone, install all necessary modules/dependencies, and get the VCAM module working.	Zoe J.D.M. Spyrou
(folder) script + output	Script.py which is the script that was used for the recon and to make the output files All the files that were used in the process like tool outputs, results in between and final results like snapchat.com-report.html and snapchat.com-results.json	Tim C.P. Moorsel
Alternatives to SnapEnhance	A document about the alternatives to Snapenhance we thought we could maybe use as a base for this project.	Tim C.P. Moorsel
Security Audit	Outcome of the tests performed on snapchat and explanations for it.	Tim C.P. Moorsel
Script explanation	What the script is, what it does, and how it does that. The document is a detailed explanation of the script.	Tim C.P. Moorsel
Final Advice	The final document that sums everything up and is a general explanation of the entire project.	Zoe J.D.M. Spyrou Tim C.P. Moorsel
